

MODERN MYSTERY QUILT INSTALLMENT #2

7. With the B semicircle right side up and the A piece face-down (so the right sides will be together), align the center creases at their edges and pin at the centers. This will be number 1.

8. Bend the field piece back to align points 2 and 3 of the field piece with points 2 and 3 of the semicircle and pin. Ease the pieces along the edges and pin at 4 and 5, the midway points on the curves. With the semicircle flat on your machine table (it will be right side up), sew the pieces together slowly using a standard $\frac{1}{4}$ " seam allowance. If you sew with the field piece on the bottom, it will pucker as you sew.

9. Press the seams open on the back then press the finished piece again from the front. Repeat steps 6-9 to make a total of 30 units.
