

Mystery Quilt Beaver Valley Piecemakers 2024-2025

Step Three: Block number two

Block Number Two: A Square in a Square

Now let's make a square in a square.

Sew a quarter square triangle of white to each side of the four colored 4 1/2" blocks. Square up your blocks from the wrong side by laying the 1/4" mark on your ruler on the X made by the seams where the white triangles meet the point of the square center. If you rotary cut this edge, you should get a perfect quarter-inch seam allowance. These blocks will be exactly six inches square.

Now add the half-square triangles as shown below. When you sew this seam, do so with the block face down so you can make sure your seam intersects the X mentioned above. That will keep your point sharp. Now, square up these blocks as you did in the previous step.

Make two of these
